Central Valley High School

Working daily to improve
ourselves, our school, and our world

This course selection guide has been designed to assist you in creating an academic plan for high school. You are urged to read this guide carefully and seek advice from parents, teachers, Learning Directors (academic counselors) and other staff members.

High School Graduation Requirements

Graduation requirements are set by the CUSD Board of Trustees. Five (5) credits are awarded per semester to students who earn a grade of A, B, C, or D in coursework.

Minimum Course Requirements

Credits

Subject Area:

English.....	40
Mathematics.....	20
Mathematics 1 or higher (10 credits)	
Other Math (10 credits)	
Science.....	20
Life Science (10 credits)	
Physical Science (10 credits)	
Social Science.....	30
World History (10 credits)	
U.S. History (10 credits)	
American Government (5 credits)	
Economics (5 credits)	
Physical Education.....	20
Fine Arts- or- Modern Language.....	10
Elective Classes.....	90
Total credits required	230 credits

Eligibility for Athletics and Extracurricular Activities

Eligibility is based on grades received at the end of each quarter. To be eligible, students must have:

- A “C” average (2.0) for all classes (total GPA)
- No more than one “F”
- An Incomplete (I) counts as an “F” for eligibility purposes
- Students may use a one-time probationary period to become eligible. Must meet probation requirements.

Central Valley Graduation Requirement Checklist

Five (5) credits are awarded to students who earn a grade of A, B, C or D in each semester of a course.

**** In order to be eligible for a University and meet A-G requirements, C's or better are required. D's do NOT count.**

English (40 credits)

English 9/ Adv English 9.....Semester 1 ☐ Semester 2 ☐
 English 10/Adv English 10.....Semester 1 ☐ Semester 2 ☐
 English 11/AP English Language.....Semester 1 ☐ Semester 2 ☐
 ERWC/AP English Literature.....Semester 1 ☐ Semester 2 ☐

Math (20 credits)

1st year math.....Semester 1 ☐ Semester 2 ☐ ****A-G: Minimum C's or better in Mathematics I, Mathematics II, and Mathematics III**
 2nd year math.....Semester 1 ☐ Semester 2 ☐
 3rd year math*.....Semester 1 ☐ Semester 2 ☐

*The Math graduation requirement is 20 credits with a minimum completion of Math I or equivalent. However, since we are a college prep school, enrollment in math junior year is **REQUIRED** at CVHS.

Science (20 credits)

Life Science.....Semester 1 ☐ Semester 2 ☐
Biology the Living Earth/Sustainable Ag Biology/ AP Biology/ Anatomy-Physiology

Physical Science.....Semester 1 ☐ Semester 2 ☐
*Ag & Soil Chemistry/ AP Chemistry/ Physics/ Chemistry in the Earth Systems/Chemistry in the Earth Systems Medical Focus
 Physics of the Universe/ Adv POTU/ Honors Ag Systems Management/ AP Physics*

3rd year science*.....Semester 1 ☐ Semester 2 ☐

*The science graduation requirement is one year of life science and one year of physical science; however, since CVHS is a college prep, enrollment in science in junior year is **REQUIRED**

Social Science(30 credits)

World History/ AP European HistorySemester 1 ☐ Semester 2 ☐
 US History/ AP US History.....Semester 1 ☐ Semester 2 ☐
 Principles of Democracy/AP American Government.....One Semester ☐
 Economics/AP American Government.....One Semester ☐

Other Requirements

PE (four semesters) Semester 1 ☐ Semester 2 ☐ Semester 3 ☐ Semester 4 ☐
Frosh PE/PE/Weight Training/ Dance I, II/Adv. Dance/Strength and Fitness/ Team Sports/ Marching Band/ Color Guard team/ Cheer

Fine Art or Foreign LanguageSemester 1 ☐ Semester 2 ☐

****A-G: 1 year of Fine Art and 2 years of the same Foreign Language is required**

Total of 230 Credits

Plan for the future: All Central Valley High School students are expected to graduate and go on to some form of further education. Without post-high school academic or career education, students' careers choice and earning power will be limited. To be prepared for this continued education, students are expected to take the most rigorous courses possible during all four years of high school.

4- Year College Entrance Requirements

“A-G” subject requirements: Minimum admission requirements for the University of California (UC) and the California State University (CSU) systems include the successful completion of the following “A-G subjects” with a grade of “C” or better.

- A) **History/Social Science:** 2 years (one year of World History and one year of U.S History or 1 semester of U.S History and 1 semester of Principles of Democracy)
- B) **English:** 4 years required (4 years of college preparatory English)
- C) **Math:** 3 years required, 4 years recommended (Mathematics I, Mathematics II, Mathematics III)
- D) **Lab Science:** 2 years required, 3 years recommended (1 year of physical science, 1 year of life science)
- E) **Foreign Language:** 2 years required, 3 years recommended (must be the same language)
- F) **Visual and Performing Arts:** 1 year (two semesters of the same class in Visual and Performing Arts)
- G) **College Prep Electives:** One year of chosen from the “A-F” courses beyond those used to satisfy the requirements above, or courses that have been approved solely in the elective area.

Other College or Training Entrance Requirements:

California State University (CSU)

- Minimum 2.5 GPA

University of California (UC):

- Minimum of 3.0 GPA
- A personal statement is required

California Community Colleges: California Community College entrance requirements include being 18 years of age and placement tests in reading, writing, and math, or a high school diploma or GED certificate. CVHS students are strongly encouraged to take rigorous math and English courses so they will be better prepared for the community college courses.

Private Colleges and Universities: Admission requirements vary with each school. Students are encouraged to explore each school’s website for information. Learning Directors are available to assist students in finding this important information.

Trade and Technical School/Colleges: Trade and technical schools differ from school to school. Students may check information available in the Counseling Office to find out about entrance requirements. Community Colleges provide many programs designed to prepare students for a trade.

Subject to change per CSU/UC policies

Agriculture

5436/5437 P Intro to Agriculture CSU/UC (g)

9th-12th Grade

Grad Credit: Elective

The Introduction to Agriculture course is an entry level course which will introduce students to many aspects of agriculture. Topics of instruction include agricultural awareness and literacy, leadership and FFA, employability skills and introduction to all aspects of the total agricultural industry including California agriculture, plant science, and animal science. Participation in hands-on activities with both plants and animals at the school farm and on campus is a required part of this class and will count as a significant part of your overall grade. Supervised agricultural experience programs and FFA leadership activities are integral components of the course and provide many opportunities for practical applications of instructional competencies. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course.

4266/4267 P Agriscience and Physics CSU/UC (d)

9th Grade

Grad Credit: Physical Science

Agriscience & Physics is a collaborative standards-based laboratory science that fulfills the physical science requirement focusing on college and career readiness. This course gives students a foundation in physics with related earth science and agriculture phenomena in addition to the Science and Engineering Practices. The following units will be covered in this course; Motion, Force, Gravity, Waves, Light Waves, Electricity & Magnetism, Energy & Renewable Energy, and Nuclear Physics & the Earth. This course also provides an opportunity and expectation for students' participation in the National FFA organization including FFA participation and a Supervised Agriculture Experience Project.

4254/4255 P Agriculture and Soil Chemistry CSU/UC (d)

10th-12th Grade

Grad Credit: Physical Science

This course explores the physical and chemical nature of soil as well as the relationships between soil, plants, animals and agricultural practices. The course provides students the opportunity to learn chemistry, and understand how it relates to agriculture, specifically plant and animal production through hands-on activities and labs. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course.

4256/4257 P Sustainable Agricultural Biology CSU/UC (d)

11th-12th Grade

Grad Credit: Life Science

Sustainable Agriculture Biology is a one year course designed to integrate biological science practices and knowledge into the practice of sustainable agriculture. It includes cell organization and processes, plant and animal reproduction, genetics, ecology, evolution, and agriculture's impact on the environment and how we as agriculturists can make decisions to maximize sustainable agriculture practices within a functioning ecosystem. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course.

Agriculture

5430/5431 P Food Science CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

Students taking this course will experience a comprehensive study in foods. Students will learn about foods from origin through consumption, as well as processes involved between. Hands-on experiences in the food system, through extensive engagement of community members and utilization of community resources will integrate course content directly as applied. Units in this course include an overview of Food Science, Nutrition and Digestion, Chemistry of Foods, operations in Food Processing, Packaging, Dairy Processing, Meat Poultry and Eggs, Cereal Grains, Legumes and Oilseed, Fruits and Vegetables, Food Safety, Regulation and Labeling, Fats and Oils, Candy and Confectionery. Students MUST complete a California Food Handler Certification in order to participate in class cooking labs and activities, which is included in the course. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course.

Prerequisite: Successful completion of Agriculture and Soil Chemistry or equivalent with a C or better.

5428/5429 PH Agriculture Systems Management (weighted GPA) CSU/UC (d) 12th Grade

Grad Credit: Physical Science

Agricultural Systems Management combines an interdisciplinary approach to laboratory science and research with agricultural management principles. Using skills and principles learned in the course, students design systems and experiments to solve agricultural management issues currently facing the industry. Additionally, students will connect the products created in this class with industry activities to link real world encounters and implement skills demanded by both colleges and careers. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course. **Prerequisite:** Successful completion of Ag & Soil Chemistry, Sustainable Ag Biology, or equivalent with a C or better. AP/Acc/Honors contract signed by student and parent.

4248/4249 P Adv. Animal Science CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

This advanced course in Animal Science will focus on livestock management practices. Included in this course will be livestock breeds, animal health, handling facilities, selection, showing, feeding & nutrition, reproduction & genetics, and many other hands-on activities with real animals. Participation with live livestock animals, at the farm & in the rabbitry, is a required part of this class and will count as a significant part of your overall grade. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course. This course is a MJC concurrent enrollment course: students have the option to earn college credit (free of charge) for taking this course.

Agriculture

4252/4253 P Advanced Veterinary Science CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

In this course, students will explore the field of veterinary medicine. Students will study the role of a veterinarian and veterinary technician in the diagnosis and treatment of animal diseases. Topics to be discussed include: veterinary terminology, breed identification, tool identification, anatomy and physiology, pathology, genetics, handling and restraint, and physical examinations along with common surgical skills. Students will engage in a variety of hands-on laboratory activities. Participation with live livestock animals is a required part of this class and will count as a significant part of your overall grade. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course. This course is a MJC concurrent enrollment course: students have the option to earn college credit (free of charge) for taking this course. Prerequisite: 'C' or better in P Advanced Animal Science if a Junior, Senior prerequisite can be waived with teacher approval

5492/5493 Intro to Ag Mechanics CSU/UC (g)

9th-12th Grade

Grad Credit: Elective

This course is designed to provide students with basic skills and knowledge in the areas of shop safety, ropework, cold metal, plumbing, electrical, woodworking and welding. Students will receive classroom instruction as well as "hands on" experience. Each unit of instruction includes a required project that is designed to allow the student to apply those skills learned in the classroom to practical application and will be shown at the Stanislaus County Fair. Due to the co-curricular nature of the FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course.

5494/5495 Intermediate Ag Mechanics CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

Formerly called Ag Welding; Students will learn how to Shield Metal Arc Weld (SMAW), Gas Metal Arc Weld (GMAW), Gas Tungsten Arc Weld (GTAW), oxy-acetylene weld and cut, braze. Students will get the experience in basic project construction and fabrication. All completed projects will be shown at the Stanislaus County Fair in Turlock. Due to the co-curricular nature of FFA and SAE (Supervised Agriculture Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course. Prerequisite: Successful completion of Intro to Ag Mechanics with a C or better, or instructor approval.

Agriculture

5496/5497 Advanced Ag Mechanics(1 OR 2 periods) CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

Formerly called ROP Welding; This course is for the development of advanced welding skills. Can be a 2 period course if approved by the instructor and learning director. Students learn advanced skills in Shield Metal Arc Weld (SMAW), Gas Metal Arc Weld (GMAW), Gas Tungsten Arc Weld (GTAW), OxyAcetylene cutting and torching, Plasma cutting and operating CNC Equipment. Students will further develop job-related skills by becoming self-starters and acquiring necessary materials for projects, while developing safety and fire prevention attitudes. They will be prepared for a job in a welding shop. All completed projects will be shown at the Stanislaus County Fair. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience), students will be required to participate in both FFA activities and SAE, both of which are graded components of the course. Prerequisite: 'C' or better in Intermediate Ag Mechanics, or instructor approval

5522/5523 Advanced Ag Mechanics II (1 OR 2 periods) CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

Formerly called ROP Welding; This course is for the development of advanced welding skills. Can be a 2 period course if approved by the instructor and learning director. Students learn advanced skills in Shield Metal Arc Weld (SMAW), Gas Metal Arc Weld (GMAW), Gas Tungsten Arc Weld (GTAW), OxyAcetylene cutting and torching, Plasma cutting and operating CNC Equipment. Students will further develop job-related skills by becoming self-starters and acquiring necessary materials for projects, while developing safety and fire prevention attitudes. They will be prepared for a job in a welding shop. All completed projects will be shown at the Stanislaus County Fair. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience), students will be required to participate in both FFA activities and SAE, both of which are graded components of the course. Prerequisite: 'C' or better in Intermediate Ag Mechanics, or instructor approval

5466/5467 P Introduction to Floriculture CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

This course is designed for students who are interested in the art of floral design. This course will cover the basic principles and techniques involved in designing and creating floral arrangements, including flower identification, flower care and processing, basic flower arranging, corsage construction, balloon design, and houseplant care. Students will learn and apply concepts such as color theory, design principles, flower and foliage selection, and basic arrangement styles to complete seasonal projects with fresh flowers as well as dry materials. They will also learn about the different tools and equipment used in floral arrangement and how to use them safely and effectively. In addition, students learn how to select all elements of an arrangement, from the container to the colors, to the flower varieties, for different occasions and events to meet the needs and preferences of clients or recipients and to convey an understanding of the effect/mood an arrangement can create. This class will also prepare students for an Advanced Floriculture course of study. Due to the co-curricular nature of FFA and SAE (supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course.

Agriculture

5468/5469 P Ag Adv Floriculture CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

This Advanced Floriculture course will give students career experience in floral design and the artistic principles of visual art. Students will create floral arrangements using advanced design principles. Part of the class will be designing and arranging for outside floral sales such as weddings and events. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course. **Prerequisite: Successful completion of ROP Introduction to Floriculture with a C or better**

5424/5425 P Ag Leadership CSU/UC (g)

9th Grade ONLY

Grad Credit: Elective

This course is designed to promote and develop leadership in the Agriculture industry. The Ag Leadership is an elective course that helps students acquire a broad understanding of a variety of leadership aspects, develop an awareness of the many career opportunities in agriculture, participate in agriculturally relevant experiences, and work cooperatively with a group to develop and expand leadership abilities. Students study agriculture issues, agricultural careers, agricultural technologies, oral and written communication and public speaking. Because of the nature of this class, student time is not limited to classroom experiences, as students should plan to be involved in a majority of FFA activities. This course will be offered during zero period. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA Activities and SAE, both of which are graded components of the course.

5438/5439 P Ag Leadership CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

This course is designed to promote and develop leadership in the Agriculture industry. The Ag Leadership is an elective course that helps students acquire a broad understanding of a variety of leadership aspects, develop an awareness of the many career opportunities in agriculture, participate in agriculturally relevant experiences, and work cooperatively with a group to develop and expand leadership abilities. Students study agriculture issues, agricultural careers, agricultural technologies, oral and written communication and public speaking. Because of the nature of this class, student time is not limited to classroom experiences, as students should plan to be involved in a majority of FFA activities. This course will be offered during zero period. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA Activities and SAE, both of which are graded components of the course.

5498/5499 P Ag Leadership II CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

This course is designed to promote and develop leadership in the Agriculture industry. The Ag Leadership is an elective course that helps students acquire a broad understanding of a variety of leadership aspects, develop an awareness of the many career opportunities in agriculture, participate in agriculturally relevant experiences, and work cooperatively with a group to

Agriculture

develop and expand leadership abilities. Students study agriculture issues, agricultural careers, agricultural technologies, oral and written communication and public speaking. Because of the nature of this class, student time is not limited to classroom experiences, as students should plan to be involved in a majority of FFA activities. This course will be offered during zero period. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA Activities and SAE, both of which are graded components of the course.

5500/5501 P Ag Leadership III CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

This course is designed to promote and develop leadership in the Agriculture industry. The Ag Leadership is an elective course that helps students acquire a broad understanding of a variety of leadership aspects, develop an awareness of the many career opportunities in agriculture, participate in agriculturally relevant experiences, and work cooperatively with a group to develop and expand leadership abilities. Students study agriculture issues, agricultural careers, agricultural technologies, oral and written communication and public speaking. Because of the nature of this class, student time is not limited to classroom experiences, as students should plan to be involved in a majority of FFA activities. This course will be offered during zero period. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA Activities and SAE, both of which are graded components of the course.

5502/5503 P Ag Leadership IV CSU/UC (g)

12th Grade

Grad Credit: Elective

This course is designed to promote and develop leadership in the Agriculture industry. The Ag Leadership is an elective course that helps students acquire a broad understanding of a variety of leadership aspects, develop an awareness of the many career opportunities in agriculture, participate in agriculturally relevant experiences, and work cooperatively with a group to develop and expand leadership abilities. Students study agriculture issues, agricultural careers, agricultural technologies, oral and written communication and public speaking. This course will be offered during zero period. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA Activities and SAE, both of which are graded components of the course.

The Arts and Technology

4500/4501 P Art I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Art I is a beginning art course. Students will learn the Elements of Art, Principles of Design, and rules of composition to create independent artwork. Students will be introduced to art movements in history. They will become proficient in drawing, painting, and design using a wide variety of media, with focus on the sketch book.

4502/4503 P Art II CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Art II is for the second-year art student. Students will expand on their design, drawing, and painting skills from Art I, using a variety of media. Students will creatively communicate through their work and will analyze and interpret the work of others through writing and discussion. **Prerequisite:** Successful completion of Art I with a C or better, or Instructor Approval.

4504/4505 P Art III CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Art III is an advanced art course. The course is designed for the motivated art student interested in majoring in art or in an art-related field, or for the student wishing to investigate other art interests. **Prerequisite:** Successful completion of Art II with a C or better, or Instructor Approval.

4510/4511 P 3-D Art (Clay Sculpture) CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

This course is designed for students with a strong interest in creating three-dimensional art primarily in ceramic media. Students will develop skills in drawing, design, and color theory related to the development and construction of 3D Art. Building techniques and methods for each media will be developed. Students will creatively communicate through their work and will interpret the work of others through writing and discussion. **Prerequisite:** Successful completion of Art I with a C or better, or Instructor Approval.

4512/4513 P Advanced 3-D Art/ Clay Sculpture CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

This course is designed for students who have completed 3-D Art with a C or better and would like to continue exploring sculpture at an advanced level. In addition to hand-building techniques, students will learn wheel-throwing. Students will develop skills in drawing, design, and color theory related to the development and construction of 3D Art. Self-evaluation and group critique will be an essential part of this course as students develop a portfolio of their work. **Prerequisite:** Successful completion of Art I and 3-D Art with a C or better, or Instructor approval.

The Arts and Technology

4580/4581 AP Art and Design (weighted GPA) CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

The AP Art and Design is intended for highly motivated students. AP requires significantly more commitment and accomplishment than the typical high school art course. Students will be expected to work in and outside of class on a specific theme of their choice to create a cohesive portfolio of work. Portfolios will be submitted in the spring, for which a student may receive college credit. Areas of investigation will include the standards of artistic perception, creative expression, historical and cultural context, aesthetic valuing, connections to other curricular areas and careers, as well as connections to their own personal life experience. Students have the opportunity to earn college credit through their Art Portfolio, with a Score of 3 or higher at the end of the school year. **Prerequisite: AP contract signed by student and parent.**

5526/5527 P Film and Television Production I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Film and Television Production 1 is designed to immerse students in the creative and technical aspects of the film and television industry. This course prepares students for future careers in the field by providing hands-on experience and foundational knowledge across various production environments. Through practical exercises and collaborative projects, students will explore the principles of cinematic arts and develop essential production skills. Students participate in all aspects of the artistic process, including creation, presenting, producing, performing, responding, critiquing, and connecting. CTE Pathway 113

5528/5529 P Film and Television Production II CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Building upon the foundational skills acquired in Film and Television Production 1, this advanced course focuses on refining students' creative and technical expertise while preparing them for careers in the dynamic film and television industry. Students will deepen their understanding of cinematic arts by applying advanced principles to a variety of creative projects. Through hands-on learning, students will gain proficiency in industry-standard tools and software, master below-the-line production crafts, and execute post-production tasks with precision. This course emphasizes collaborative work in diverse production environments, including scripted, unscripted, episodic, commercial, music video, broadcasting and virtual production. CTE Pathway 113. **Prerequisite: Successful completion of Film and Television Production I with a C or better or instructor approval.**

5530/5531 P Film and Television Production III CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

Film & Television Production III is an advanced, hands-on course designed for high school students passionate about storytelling through film and media. Building on foundational and intermediate skills, students will delve deeper into professional techniques, including advanced cinematography, scriptwriting, directing, editing, and sound design. Emphasis is placed on producing high-quality projects such as short films, documentaries, podcasting, promotional

The Arts and Technology

content and news broadcast, while mastering industry-standard tools and workflows. Students will collaborate in production teams, develop their creative portfolios, and explore career pathways in the film and television industry. This capstone course prepares students for postsecondary education and entry-level industry opportunities. CTE Pathway 113.

Prerequisite: Successful completion of Film and Television Production II with a C or better or instructor approval.

5546/5547 P Film and Television Production IV CSU/UC (f)

12th Grade

Grad Credit: Fine Art (pending)

Film & Television Production IV is an advanced capstone course designed for students seeking to refine their professional skills and prepare for postsecondary study or careers in the film, television, and media industries. Building upon advanced production techniques, students will take on leadership roles within collaborative production teams and manage projects from concept through final delivery. Instruction emphasizes industry-level practices in directing, cinematography, lighting, sound design, editing, post-production workflows, and production management. Students will develop a polished professional portfolio, including narrative, documentary, broadcast, or commercial-style projects, while exploring industry standards, career pathways, and real-world expectations. **Prerequisite:** Successful completion of Film and Television Production III with a C or better or instructor approval.

4614/4615 P Computer Graphics CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

The introductory course in computer graphics and digital photography will focus on the use of Adobe PhotoShop software with emphasis on image creation and manipulation. The course will include introductory digital photography, image creation in various applications, scanning, and digital portfolio production. CTE Pathway 111

4530/4531 P Digital Photography CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Digital Photography as a Fine Art is designed for students who are interested in fine art photography as a means of expression. The emphasis is on approaching the world of photography as a means of artistic perception and will focus on the elements of art and principles of design and composition, as well as the history of photography. The technical aspect of this course will include the medium, equipment, techniques, and terminology related to digital photography. Students will learn the manual workings of a camera; principles of design relating to both art history and current trends in the industry; storing, archiving, and printing procedures; as well as software for post-process image manipulation. General computer experience is necessary, but no prior knowledge of the particular software programs used in the class is required. The California State Standards for the Visual Arts serve as the foundation for the assignments in the course.

The Arts and Technology

4536/4537 P Adv. Digital Photo/Graphics CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

This course explores the advanced integration of digital media including digital images and computer graphics. Students work on multimedia projects from concept (content gathering/research) to project completion (authoring/transmission) and focus on the media and visual communication. Students research historical and cultural context as well as develop and demonstrate skill through critique, creation of photographic and multimedia projects and presentations. Venues include portfolios, web productions, and live presentations. This course also prepares students to work in teams and deploy projects for community organizations and businesses. Students will study Art Elements and Principles of Design. This is an excellent preparation course for the 2-D AP Studio Art Portfolio. CTE Pathway **Prerequisite:** Successful completion of Digital Photography or Computer Graphics with a C or better or instructor approval.

5516/5517 P Adv. Digital Photo/Graphics II CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Students will refine their creative and technical skills and prepare for careers in design across industries. Students will apply principles of design, graphic design, photography, and visual storytelling to creative projects. Students will engage in independent and collaboratively managed projects. They will gain proficiency in industry-standard tools and software to design, edit, and publish campaigns, products, services, artwork, websites, marketing kits, publications, multimedia graphics and/or experiences for a variety of audiences and clients. Students will develop a professional portfolio and understand the application of skills in workplace environments. Students will study Art Elements and Principles of Design. This is an excellent preparation course for the 2-D AP Studio Art Portfolio. CTE Pathway **Prerequisite:** Successful completion of Adv. Digital Photo/Graphics I with a C or better or instructor approval.

5518/5519 P Adv. Digital Photo/Graphics III CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art (pending)

This course explores the advanced integration of digital media including digital images and computer graphics. Students work on multimedia projects from concept (content gathering/research) to project completion (authoring/transmission) and focus on the media and visual communication. Students research historical and cultural context as well as develop and demonstrate skill through critique, creation of photographic and multimedia projects and presentations. Venues include portfolios, web productions, and live presentations. This course also prepares students to work in teams and deploy projects for community organizations and businesses. Students will study Art Elements and Principles of Design. This is an excellent preparation course for the 2-D AP Studio Art Portfolio. CTE Pathway **Prerequisite:** Successful completion of Adv Digital Photo / Graphics II with a C or better or instructor approval.

The Arts and Technology

4576/4577 P Computer Science Discoveries CSU/UC (d)

9th-11th Grade

Grad Credit: Elective

This course is an introductory course that empowers students to create authentic artifacts from hands-on activities to engaging with computer language as a medium of creativity, communication and problem solving while reflecting on their learning. Students will learn how to problem solve while creating their own webpage using HTML and applications within the school year. (Computer Science Language: Java Blocks/Java Script)

4258/4259 P AP Computer Science Principles (Concentrator) CSU/UC (d)

9th-12th Grade

Grad Credit: Elective

This college level course offers a multidisciplinary approach to teaching the underlying principles of computer science. Students will be introduced to the creativity aspects of programming, digital information, the internet, algorithms, data, cybersecurity and global impact. The course curriculum and assignments are designed to improve critical thinking while collaborating with classmates and peers. In addition to credit for this course, students have the opportunity to take the AP exam for this course in May. Students who earn a “3” or better on the AP exam may earn college credit. This course receives UC/CSU “d” computer science credit.

Prerequisite: “C” or better in Computer Science Discoveries or Concurrently in or have passed Int. Mathematics II &/or LD approval and an AP Contract signed by Parent and Student

5542/5543 P Intro to Engineering PLTW (Concentrator) CSU/UC (g)

9th-11th Grade

Grad Credit: Elective

Introduction to Engineering Design (IED) is the first engineering course in the PLTW Engineering Program. Students are introduced to the engineering design process, applying math, science, and engineering standards to identify and design solutions to a variety of real problems. They explore engineering tools and apply a common approach to the solution of engineering problems. Students apply systems thinking and consider various aspects of engineering design including material selection, human-centered design, manufacturability, assembly and sustainability. They work both individually and in collaborative teams to develop and document design solutions. Students will also use engineering notebooks and 3D modeling software to create and document their designs and bring them to life through 3D printing. This course receives UC/CSU “d” engineering credit.

5544/5545 P Principles of Eng. Design PLTW (Capstone) CSU/UC(g)

10th-12th Grade

Grad Credit: Elective

The second course in the Project Lead The Way (PLTW) series, Principles of Engineering, is a course designed to be the second exposure to the PLTW Engineering program. This course introduces students to engineering concepts that are applicable to a variety of engineering disciplines and empowers them to develop technical skills through the use of engineering tools such as 3-D modeling software, hands-on prototyping equipment, programming software, and robotics hardware to bring their solutions to life. Students apply the engineering design process to solve real-world problems across a breadth of engineering fields such as mechanical, robotics, infrastructure, environmental sustainability, and product design and development. This course receives UC/CSU “d” engineering credit. **Prerequisite:** Successful completion of Introduction to Engineering Design (IED) with a C or better.

The Arts and Technology

5402/5403 P Animation CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

In Animation, students will explore motion graphics and cartoon animation. Projects will include traditional hand drawn animation, stop motion, 2D and 3D animation with the aid of computer software. Students will create character designs, storyboards and are expected to draw from daily life. All work will be original. The course meets CTE Pathway 111. **Prerequisite: Successful completion of Computer Graphics with a C or better, or instructor approval.**

5512/5513 P Animation II CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

Advanced Animation is a second level Animation course. The course is for students who wish to create advanced creative projects in a variety of animation mediums. Students will create storyboards, backgrounds, character designs, and animate independent projects using traditional animation, stop motion, and computer graphics. This course will provide students with the opportunity to function in a variety of roles within the animation production team. Students will utilize skills acquired in their introductory animation course to solve authentic industry problems and produce a variety of professional quality animation products. Course meets CTE Pathway 111. **Prerequisite: Successful completion of P Animation with a C or better.**

5514/5515 P Animation III CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

In this advanced animation course, students will invest significant time, skill and creativity into the development of a short animation film/films for presentation to the public. Students will continue their life drawing practice with cafe style drawings as well as character design and storyboarding. Students will update their animation reel for presentation to prospective colleges or industry jobs. Their reels will demonstrate their comprehension of the principles of animation and expressing their own artistic voice. This course receives UC/CSU “f” visual arts credit. Course meets CTE Pathway 111. **Prerequisite: Successful completion of P Animation II with a C or better.**

4522/4523 P Dance Production I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art or P.E

Dance Production I focuses on developing techniques in a variety of disciplines including jazz, Ballet, Modern, Contemporary, hip hop, and Ethnic dance. Elements of dance composition will be explored through choreography assignments that culminate in a performance. A strong emphasis is placed on developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students will be involved in all aspects of a performance: ticket sales, props, costume design, fundraising, and dance choreography.

The Arts and Technology

4524/4525 P Dance Production II CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art or P.E

Dance Production II will build on the skills and terminology that students learned in Dance Production I. Dance Production II focuses on further developing techniques in a variety of disciplines including jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through more advanced choreography assignments that culminate in performance. A strong emphasis is placed on further developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Spring Dance Showcase at the end of the year. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: Successful completion of Dance Production I or instructor approval.

4592/4593 P Dance Production III CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art or P.E

Dance Production III will build on the skills and terminology that students learned in Dance Production II. Dance Production III focuses on continuing to further develop technique in a variety of disciplines including Jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through more advanced choreography assignments that culminate in a performance. A strong emphasis is placed on further developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Fall and Spring Dance Showcase at the end of the year. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: Successful Completion of Dance Production II or instructor approval.

4526/4527 P Advanced Dance Production CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art or P.E

Adv. Dance Production is an advanced class for students who are interested in performing and pursuing dance for personal interest, further academic preparation, or for a possible career in dance or a dance-related field. This course will continue to build on the skills that students work on in Intermediate Dance. Adv Dance Production focuses on perfecting technique in a variety of disciplines including jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through advanced choreography assignments that culminate in performance. A strong emphasis is placed on perfecting skills in dance technique and terminology. The history of dance and development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Winter and Spring Dance Showcases. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: This course is by audition or teacher recommendation only.

The Arts and Technology

4486/4487 P Theater Arts I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Theater Arts I will offer entry-level drama students a course that will explore the basic elements of drama/acting skills and develop their knowledge of related genres. The students will work independently and in groups on a variety of theater related subjects such as improvisation, pantomime, character development, monologue and scene study. Auditioning skills will be emphasized.

4488/4489 P Theater Arts II CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Theater Arts II is a course for drama/acting students with prior experience (Theater Arts I). The students will receive instruction utilizing an accelerated curriculum that includes advanced acting skills, scene and monologue mastery, advanced improvisation and expanded character development. Students enrolled in Theater Arts II will be encouraged to audition for and/or be involved in the various theater productions at CVHS throughout the year. **Prerequisite:** Successful completion of Theater Arts I with a C or better, or instructor approval.

4490/4491 P Theater Arts III CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

Theater Arts III is a course for drama/acting students with prior experience (Theater Arts I or II). The students will receive instruction utilizing an accelerated curriculum that includes advanced acting skills, scene and monologue mastery, speech making, advanced improvisation and expanded character development. They will also learn behind the scenes crafts such as basic stage makeup, lighting and sound. Students enrolled in Theater Arts III will be expected to audition for and/or be involved in the various theater productions at CVHS throughout the year. **Prerequisite:** Successful completion of Theater Arts II with a C or better, or instructor approval.

4492/4493 P Theater Arts IV CSU/UC (f)

11th-12th Grade

Grad Credit: Fine Art

Theater Arts IV is the advanced studies class for emerging actors and actresses at CVHS. The students will be expanding their various acting skills and working toward the mastery required to audition and perform for projects at the high school level and above including community theater and area college productions. The students will work closely together on classroom projects with a mix of 2 levels. They will experience giving and receiving constructive criticism of their work. They will also explore the behind the scenes world and the history of the theater. Public performances will be required.

Prerequisite: Successful completion of Theater Arts III with a C or better, or instructor approval.

The Arts and Technology

5476/5477 P Theater Stagecraft and Technology CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

This course will have students analyzing literature and translating the written page to the stage through set, props, light, and sound designs. Students will learn the principles and techniques of building, painting, mounting, and rigging stage scenery as well as theory and practice in stage lighting and sound. Individual project work will be included.

4610/4610 P Beginning Piano CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Students enrolled in this course will learn the fundamental elements needed to play the piano. The curriculum is founded on two main components. The first is music theory, where students will learn to read musical notation, symbols, and academic vocabulary needed to apply this knowledge in the practical act of playing the piano. By learning these elements students will develop musicianship skills in the areas of rhythm and melodic dictation that can be applied to any other musical instrument. The music taught will cover multiple genres of music found throughout music history, including Pop, R&B, Blues, Alternative, as well as classical, world music, and folk music of different countries. Students will also have a chance to research and write about the music they are learning to play.

4460/4461 Intermediate Piano CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

The course will be based on applying skills and concepts covered in the Beginning Piano class at a higher level of rigor. The class will take a broader, and deeper, look into music history. There will be public performance opportunities that occur outside of class in collaboration with other CV music students that this course would support. It will create a pathway for those students who wish to reach beyond a "beginning" level on the instrument, as well as increasing their understanding of music theory. Prerequisite: Successful completion of Beginning Piano or Instructor Approval. *Note: Instruction for Advanced students CAN be accommodated within the structure of this course.*

4494/4495 P Guitar I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

This performance-based course will cover beginning guitar techniques such as music theory, history, and musicianship. Students will learn the basics of guitar playing in the first position. Students will also learn to read musical notation, guitar tablature, and guitar chords as well as be able to perform music in a variety of styles. Classroom performances, both in groups and solo, are an expectation of this course. The course is designed as an introduction to guitar, and previous playing experience is not required.

The Arts and Technology

4448/4449 P Concert Choir CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Beginning to developing level mixed choir open to any CVHS student. Concert Choir members will learn the basics of singing and then work toward skills for ensemble singing and performance. Rehearsal skills will be developed and students will learn to read music. Some public performance is expected.

4446/4447 P Choraliers CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Choraliers is CVHS advanced mixed choir. Singers will receive instruction in an accelerated choral curriculum. Included will be vocal pedagogy. Sight-reading and music theory. Singers will perform a variety of choral music including multiple cultures, styles and languages. Choraliers will also work on the skills required for a Show Choir style of performing with basic movements and choreography. Choralier performances are mandatory. There will also be many optional performance opportunities.

Prerequisite: Selection for Choraliers is by audition only. (Auditions can be scheduled with Instructor).

4544/4545 P Concert Band CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

This year-long course is a performance-oriented class designed to allow the beginning-intermediate musician to improve and maximize their capabilities on their given instruments. Students will learn and perform music of the concert/symphonic band literature. Performances will include winter and spring concerts and various concert festivals and competitions in which the ensemble is entered. Attendance at all rehearsals and performances is required. Under normal circumstances students will be concurrently enrolled in the marching band to receive additional PE credit. However, individual exceptions may be made for students with schedule conflicts or other individual circumstances, which may make fulfilling this requirement unfeasible for the student. **Note:** Students should have previous experience on a symphonic band musical instrument, though it is not required.

4438/4439 P Wind Ensemble CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

This year-long course is a performance-oriented class designed to allow experienced musicians to improve and maximize their capabilities on their given instruments. Students will learn and perform advanced music of symphonic band literature. Performances will include a winter and spring concert and various concert festivals and competitions in which the ensemble is entered. Attendance at all rehearsals and performances is required. Students in this class are required to be concurrently enrolled in marching band to receive additional PE credit. **Prerequisite:** Must have previous playing experience and successfully complete the audition process.

The Arts and Technology

5406/5407 P Percussion Band CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Percussion is a performance-oriented class with an emphasis on different drums and mallet techniques. Rhythm reading, music vocabulary, and percussion performance techniques will serve as a year-long goal. Students will learn to play on a variety of mallet percussion and drum instruments. Performance music will focus on small ensemble and concert percussion works. Performances will include a winter and spring concert as well as other performances scheduled throughout the year. Attendance outside of class rehearsals and performances is a required portion of the class. Under normal circumstances students will be concurrently enrolled in the marching percussion program to receive additional PE credit. However, individual exceptions may be made for students with schedule conflicts or other individual circumstances which may make fulfilling this requirement unfeasible for the student.

5458/5459 P Adv. Percussion Band CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art

Percussion is a performance-oriented class with an emphasis on different drums and mallet techniques. Rhythm reading, music vocabulary, and percussion performance techniques will serve as a year-long goal. Students will learn to play on a variety of mallet percussion and drum instruments. Performance music will focus on small ensemble and concert percussion works. Performances will include a winter and spring concert as well as other performances scheduled throughout the year. Attendance outside of class rehearsals and performances is a required portion of the class. Under normal circumstances students will be concurrently enrolled in the marching percussion program to receive additional PE credit. However, individual exceptions may be made for students with schedule conflicts or other individual circumstances which may make fulfilling this requirement unfeasible for the student. **Prerequisite: Successful completion of Percussion band or instructor approval.**

4440/4441 P Advanced Jazz Ensemble CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

Students will learn intermediate improvisational techniques to rehearse and perform jazz music in all styles and genres. Music theory and music history are core components of this class. The jazz band will perform at festivals, concerts, and community events throughout the year. Attendance at outside of class rehearsals and performances is a required portion of the class. The jazz ensemble is a performance-based class designed for intermediate students with experience on saxophone, trumpet, trombone, guitar, piano, percussion, drum set, or bass. Under normal circumstances students will be concurrently enrolled in the marching band to receive additional PE credit. However, individual exceptions may be made for students with schedule conflicts or other individual circumstances, which may make fulfilling this requirement unfeasible for the student. **Prerequisite: One year of playing experience and performance audition but may be waived with instructor approval**

The Arts and Technology

4548/4549 P Royal Color Guard CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art

This performance-based class provides students with a general understanding of rhythmic construction and patterns allowing for the instruction of rhythmic accuracy through the use of guard equipment such as flags, rifles, sabers and other auxiliary equipment. Students will develop the techniques and skills needed to perform various times throughout the school year. Under normal circumstances students will be concurrently enrolled in the marching band to receive additional PE credit. However, individual exceptions may be made for students with schedule conflicts or other individual circumstances, which may make fulfilling this requirement unfeasible for the student. **Prerequisite: Instructor approval/audition.**

AVID

4598/4599 AVID 9 UC/CSU - Elective (“g”)

9th Grade

Grad Credit: Elective

AVID is more than just a class; it is a community of learners that extends beyond the walls of the classroom to support students as they work towards achieving their goals and dreams. In the ninth-grade AVID Elective course, students will focus on transitioning to high school life and improving the academic skills and tools necessary to succeed now, and in college and career. In this course, students will increase awareness of their personal contributions to their learning, as well as their involvement in their school and community. Students will work in collaborative settings, learning how to participate in collegial discussions and use sources to support their ideas and opinions. In-class tutoring sessions are part of the AVID elective to support student success in all classes as well as provide a foundation to be successful in all college preparatory coursework in high school (a-g courses, advanced courses, AP courses, Dual Enrollment courses, etc.). Students will also be exposed to different field trips, guest speakers and research, to increase their knowledge of college and career options. **Prerequisite:** Application and interview required; at least a 2.0 GPA

4600/4601 AVID 10 UC/CSU - Elective (“g”)

10th Grade

Grad Credit: Elective

AVID is a class for students with a desire and determination to challenge themselves to reach their full potential. During the tenth-grade AVID Elective course, students will develop and extend the foundational learning skills to be successful in rigorous coursework in high school (a-g courses, advanced courses, AP courses, Dual Enrollment courses, etc.). Students will continue to refine and adjust their academic learning plans and goals, increasing awareness of their actions and behaviors. As students increase the rigorous course load and school/community involvement, they will refine their time management and study skills accordingly. Students will expand their writing portfolio to include: analyzing prompts, supporting arguments and claims, character analysis and detailed reflections. Students will also analyze various documents, in order to participate in collaborative discussions and develop leadership skills in those settings. Students will expand their vocabulary use, continuing to prepare for college and career entrance. Text analysis will focus on specific strategies to understand complex texts that can be applied both to college and career. Lastly, students will narrow down their college and careers of interest, based on personal interests and goals. Students are encouraged to take at least one Advanced level course. In-class tutoring sessions are part of the AVID elective to support student success in all classes. Students will also be exposed to different field trips, guest speakers and research, to increase their knowledge of college and career options. **Prerequisite:** Application and interview required; at least a 2.0 GPA

AVID

4602/4603 AVID 11 UC/CSU - Elective (“g”)

11th Grade

Grad Credit: Elective

AVID is a class where students are expected to take ownership of their learning, ask questions to deepen their understanding, and be willing to work towards goals, including rigorous coursework that will adequately prepare them for success in college and career. The eleventh-grade AVID Elective course is the first part in a junior/senior curriculum that focuses on writing and critical thinking expected of first- and second-year college students. In addition to the academic focus of eleventh-grade, there are activities, units, and tasks that should be undertaken during the junior year to support students as they apply to college and confirm their postsecondary plans. Students will develop critical reading and writing skills, refine study and organization habits, and practice public speaking skills while working collaboratively with peers and college student tutors. Students will learn about post-secondary options, financial aid, college life, and majors in preparation for senior year decisions. Students will also draft forms for letters of recommendation, create a high school resume, and draft personal statements for college application essays. Students are encouraged to take at least one Academic Enrichment or AP class and the corresponding exam. In-class tutoring sessions are part of the AVID elective to support student success in all classes. Students will also be exposed to different field trips, guest speakers and research, to increase their knowledge of college and career options. **Prerequisite:** Application and interview required; at least a 2.0 GPA

4604/4605 AVID 12 UC/CSU - Elective (“g”)

12th Grade

Grad Credit: Elective

AVID is a class where students prepare for college and work beyond high school and success in a global society. In the AVID Elective twelfth-grade course, students will continue to learn in a collaborative environment with peers and college student tutors. Students will write college admissions essays, fill out college applications, and complete the process of applying for financial aid through the FAFSA or DREAM Act application and applying for scholarships. In preparation for the rigors of college, students will focus on writing and critical thinking expected of first- and second-year college students as well as 21st Century careers. Students will complete a final research essay project building on knowledge and skills developed in their junior year in AVID. In addition to the academic focus of the AVID senior seminar, there are college-bound activities, methodologies and tasks that should be achieved during the senior year that support students as they apply to colleges and confirm their postsecondary plans. Students will also receive lessons that will help them be successful in life beyond high school, including financial literacy. Students are encouraged to take at least one Academic Enrichment or AP class and the corresponding exam. In-class tutoring sessions are part of the AVID elective to support student success in all classes. Students will also be exposed to different field trips, guest speakers and research, to increase their knowledge of college and career options. **Prerequisite:** Application and interview required; at least a 2.0 GPA

Public Safety (CTE)

5446/5447 P Criminal Justice CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

This course is designed to provide students with the necessary skills and content knowledge in the field of law enforcement. Students will become acquainted with the entire criminal justice system and numerous career opportunities (i.e. the court system, probation, corrections, patrol, investigations, and juvenile justice). Students will understand the principles on which the United States was founded; the structure of government at the local, state, and federal level; the individual and civil liberties needed to maintain a democratic society; and the way in which order is maintained through law enforcement and the judiciary system.

5448/5449 P Adv Police Procedures CSU/UC (g)

12th Grade

Grad Credit: Elective

This advanced course is designed to prepare individuals for specific careers or jobs in Public Safety such as law enforcement, homeland security, and corrections. Content of these various courses would contain the essential knowledge and skill development of that specific career. Students will learn about the specific organizational structure of the oversight agency, laws regulations and policy for specific agencies, state laws and guidelines for career entry as well as certification hours, skill proficiency and employment requirement for the specific career in Public Safety. Students develop the skills both academically and physically to meet the demands of the specific career, the understanding of the importance of having a clean background check and the understanding of ethics, morals and service to the community. Students will have the opportunity to participate in workplace learning, prepare for postsecondary options and qualify to take examinations and certification as set forth by California State regulation and agency requirements of age, skill and knowledge. **Prerequisite: Completion of Criminal Justice**

Guidance and Leadership

5480/5481 ASB Leadership I

9th-12th Grade

Grad Credit: Elective

The leadership class is for students who wish to be involved in student government, be instrumental in all school activities, and have involvement in positive changes at Central Valley High School. Students are required to work at sporting events, dances and extra-curricular activities. Students will gain skills in communication, organization, business, personal and social responsibility, group processing and problem solving. The leadership class is for students who are involved in student government at Central Valley. Students in the leadership class will be elected officers or appointed commissioners who have been appointed by the Leadership Council and instructor. **Prerequisite:** Students are selected by application/interview process.

5202/5203 Renaissance Leaders (Ambassadors)

11th-12th Grade

Grad Credit: Elective

The goal of the Ambassadors & Renaissance class is to teach students how to be a leader and positive role model on campus. Students will be involved in mentoring Freshmen, organizing events, and community service. Students will also be responsible for promoting a positive school environment at Central Valley by recognizing students and staff for various successes and milestones. The class also engages in recognizing and rewarding academic achievement and improvement through the Renaissance program. Students in the Ambassador course must be a member of the club and will be determined through the Ambassador selection committee. Ambassador students must apply to be in the Ambassador class in the spring and, if accepted into the class, will be required to be in the Ambassador club. **Prerequisite:** Students are selected by application/interview process.

Dual Enrollment (College-Level Courses)

10th- 12th Grade

Grade Credit: TBD

Students will be enrolled in an online Modesto Junior College course. During the school day, students will have a period to work on their assigned Modesto Junior College course. By engaging in a college course during high school, students will have the opportunity to build collegiate academic habits and prepare for post-secondary study. Students who pass the course will earn concurrent high school credits and college units based on the Modesto Junior College course description. There is no cost to the student for the classes or the college units. College courses will be added to a student's high school transcript and count as a weighted GPA.

Example of course offerings: Health 110, Sociology 101, Film Appreciation, History 101, History 102, English 101 *Pending on Modesto Junior College Course Availability.*

Prerequisite: Students and guardians are required to sign a dual enrollment MOU and apply to Modesto Junior College. Students should contact their Learning Director for more information.

English

4030/4031 P English 9 CSU/UC (b)

9th Grade

Grad Credit: English

This standards-based college preparatory English course is designed to meet the needs of students at a variety of levels. Students are expected to respond to both a variety of literary genres and a variety of writing situations at grade level. Students will be exposed to a variety of writing, speaking, listening, reading and comprehension activities. Essay writing is taught as a process. Grammar usage, mechanics, vocabulary, and test taking skills are embedded in the material given. Students will be exposed to research skills. Students are expected to read and write outside of the classroom setting.

4056/4057 P Advanced English 9 CSU/UC (b)

9th Grade

Grad Credit: English

This standards-based college preparatory English course is designed as a step in the process of preparing for both college and for Advanced Placement courses that are offered in the 11th and 12th grade. This course emphasizes all of the skills of CP English 9, but with increased rigor through assignment variety and pacing. This course also emphasizes critical thinking, reading, writing, and researching. Students are expected to write analytically, informatively, and creatively and also to demonstrate accurate use of English conventions. Vocabulary and test taking skills are also emphasized. Students are expected to read grade level and above grade level material. Students will be assigned to read and write outside of the classroom setting. Students are also expected to complete an assignment during the summer as preparation for skills emphasized throughout the course. **Prerequisite: AP contract signed by student and parent**

4036/4037 P English 10 CSU/UC (b)

10th Grade

Grad Credit: English

This standards-based college preparatory English course is designed to meet the needs of all students at a variety of levels. Students are expected to respond to multiple literary genres and writing situations at grade level. This course builds on the skills and standards addressed in previous English courses and written expression and language development are emphasized. Areas of study include 1st and 3rd person compositions and a variety of reading selections, including poetry, short stories, and nonfiction essays.

English

4058/4059 P Advanced English 10 CSU/UC (b)

10th Grade

Grad Credit: English

This standards-based college preparatory English course is designed as a step in the process of preparing for both college and for Advanced Placement courses that are offered in the 11th and 12th grades. This course emphasizes all of the skills of P English 10, but with increased rigor through assignment variety and pacing. This course also emphasizes critical thinking, reading, writing, and researching. Students are expected to write analytically, informatively, and creatively and also to demonstrate accurate use of English conventions. Vocabulary and test taking skills are also emphasized. Students are expected to read grade level and above grade level material. Students will be assigned reading and writing outside the classroom setting. Students can also expect to be asked to complete an assignment during the summer as preparation for skills emphasized throughout the course.

4040/4041 P English 11 CSU/UC (b)

11th Grade

Grad Credit: English

This standards-based college preparatory English course is designed to meet the needs of students at a variety of levels. Students are expected to respond to a variety of genres and a variety of writing situations at grade level. The literary emphasis for this course is on American literature. This course builds on the skills and standards addressed in previous English courses. Written expression and language development are emphasized. Areas of study include a variety of writing situations such as editorial writing, reflective writing, descriptive writing, autobiographical writing, and historical research. Students are expected to read and write outside the classroom setting.

4042/4043 AP English Language (weighted GPA) CSU/UC (b)

11th Grade

Grad Credit: English

The AP English Language and Composition course focuses on the development and revision of evidence-based analytic and argumentative writing, the rhetorical analysis of nonfiction texts, and the decisions writers make as they compose and revise. Students evaluate, synthesize, and cite research to support their arguments. Additionally, they read and analyze rhetorical elements and their effects in nonfiction texts—including images as forms of text—from a range of disciplines and historical periods. The AP English Language and Composition course aligns to an introductory college-level rhetoric and writing curriculum. **Prerequisite: AP contract signed by student and parent**

English

5398/5399 P Expository Reading & Writing CSU/UC (b)

12th Grade

Grad Credit: English

The goal of this course is to prepare college-bound seniors for literacy demands in higher education. Students will learn about the rhetorical strategies employed by authors and to apply those strategies in their own writing. They will read closely *to* examine the relationship between an author's argument or theme and his or her audience and purpose; *to* analyze the impact of structural and rhetorical strategies; and to examine the social, political and philosophical assumptions that underlie the text. By the end of the course, students will be able to use this process independently when reading unfamiliar texts and writing in response to them.

4046/4047 AP English Literature(weighted GPA) CSU/UC (b)

12th Grade

Grad Credit: English

An AP English Literature course engages students in the careful reading and critical analysis of imaginative literature. Through the dose reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students consider a work's structure, style, and themes as well as such smaller-scale elements as the use of figurative language, imagery, symbolism and tone. Students prepare for the Advanced Placement Examination in English Literature and Composition to earn possible college-level credit. **Prerequisite: AP contract signed by student and parent**

4586/4587 P Yearbook I CSU/UC (g)

9th-12th Grade

Grad Credit: Elective

This course is designed for students interested in learning computer publishing, writing, and photography skills to be used in the production of the school yearbook. Students must exhibit a sense of responsibility and leadership. Students will be involved in writing, design, sales, computer keyboarding, and photography. Students design layouts, write copy, and prepare pictures during the first three quarters of the school year. Fundraising is also required. The amount of time spent outside of class is dependent upon staff ability, book content, and publishing deadlines.

4588/4589 P Yearbook II CSU/UC (g)

10th-12th Grade

Grad Credit: Elective

Yearbook II is designed for students who wish to build on the skills learned in Yearbook I, focusing on advanced techniques in computer publishing, writing, photography, and yearbook production. Students will take on leadership roles and demonstrate a strong sense of responsibility in all aspects of creating the school yearbook. This course emphasizes advanced design, layout creation, copywriting, photo editing, and sales strategies. Students will refine their skills in editing, storytelling, and marketing while working collaboratively to meet publishing deadlines. Fundraising is a required component of the course, and additional time outside of class may be necessary, depending on the complexity of the yearbook and staff performance. **Prerequisite:** Successful completion of Yearbook I or instructor approval.

English

4590/4591 P Advanced Yearbook Design CSU/UC (f)

11th-12th Grade

Grad Credit: Elective

Advanced Yearbook Design is designed for students who have successfully completed Yearbook II and wish to further refine their expertise in yearbook production. This course focuses on advanced principles of graphic design, layout aesthetics, creative storytelling, and photojournalism. Students will take on leadership roles in overseeing the production process, ensuring high-quality work, and mentoring peers. Emphasis is placed on advanced software skills, innovative design techniques, and effective marketing strategies to promote the yearbook. Students will be responsible for managing deadlines, organizing fundraising efforts, and contributing to all aspects of production. Additional time outside of class may be required to meet publishing goals and achieve professional-quality results. Prerequisite: Successful completion of Yearbook II or instructor approval. **Prerequisite: “C” or better in Yearbook Design II.**

4606/4607 P Yearbook Design III CSU/UC (f) (Pending)

12th Grade

Grad Credit: Elective

In this course, students will focus on three primary objectives: 1) to assist the Advanced Yearbook Editors in managing and overseeing the Yearbook and 2) to produce a book which reflects journalistic standards. Lastly 3) students in Yearbook III will be in charge of photo editing, training, and camera upkeep. Students in Yearbook III will be in charge of peer editing spreads created by Yearbook II. This includes demonstrating the proper procedures for handling the cameras and taking photographs, writing captions, uploading and tagging photos in the website, and setting up mods and layouts on the actual spreads. Throughout the process they will also aid in marketing and advertising for the yearbook and managing pages and content such as surveys, senior quotes, baby photos, and other media. **Prerequisite: “C” or better in Advanced Yearbook Design**

5336/5337 AP Psychology (weighted GPA) CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

The AP Psychology course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. **Prerequisite: AP Contract signed by student and parent.**

ELD

ELD I

9th-12th Grade

Placement is determined by English proficiency and years in the U.S.

Grad Credit: Elective

This course is intended for emerging students of English. It focuses on increasing students' English skills in the areas of speaking, listening, reading and writing. Course work is centered on developing English skills immediately useful in school, classroom, and community settings.

ELD II

9th-12th Grade

Placement is determined by English proficiency and years in the U.S.

Grad Credit: Elective

This course is intended for expanding students of English. It focuses on increasing students' English skills in the areas of speaking, listening, reading and writing. Students will learn basic academic vocabulary and skills in exploring language across the curriculum.

ELD III

9th-12th Grade

Placement is determined by English proficiency and years in the U.S.

Grad Credit: Elective

This course focuses on reading, writing, listening and speaking, as well as developing an ability to comprehend and analyze rigorous English language texts and media. Students use graphic organizers and a variety of strategies to make meaning in context.

ALD I

9th-12th Grade

Placement is determined by English proficiency and years in the U.S.

Grad Credit: Elective

This course expands listening, speaking, reading and writing skills with an emphasis on the development of complex literacy skills. Students focus on word analysis, fluency, and vocabulary development. Students are expected to respond to multiple forms of academic media in a variety of ways.

ALD II

9th-12th Grade

Placement is determined by English proficiency and years in the U.S.

Grad Credit: Elective

This course is a bridging level English language development class. The class content is designed to help students acquire grade level English language proficiency in listening, speaking, reading and writing. Students focus on word analysis, fluency, and vocabulary development. Students are expected to respond to multiple forms of academic media in a variety of ways.

Mathematics

4168/4169 P Int. Mathematics I CSU/UC (c)

9th-11th Grade

Grad Credit: Math

The courses in the Integrated Pathway present mathematics as a coherent subject and blend standards from different conceptual categories. The fundamental purpose of the Mathematics I course is to formalize and extend students' understanding of linear functions and their applications. The critical topics of study deepen and extend understanding of linear relationships—in part, by contrasting them with exponential phenomena and, in part, by applying linear models to data that exhibit a linear trend. Mathematics I uses properties and theorems involving congruent figures to deepen and extend geometric knowledge gained in prior grade levels.

4190/4191 P Int Mathematics I-II CSU/UC (c)

9th Grade

Grad Credit: Math

Students in Mathematics I-II formalize and extend the mathematics learned in Math 7 and 8 at an accelerated progression. Through both content standards and math practices, students learn concepts and skills in the critical areas of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Students deeply analyze the concepts and skills necessary for placement in AP Calculus upon successful completion of the Mathematics I-II through AP Pre-Calculus course sequence: **Prerequisite: Teacher recommendation.**

4170/4171 P Int. Mathematics II CSU/UC (c)

10th-12th Grade

Grad Credit: Math

The courses in the Integrated Pathway present mathematics as a coherent subject and blend standards from different conceptual categories. The Mathematics II course focuses on quadratic expressions, equations, and functions and on comparing the characteristics and behavior of these expressions, equations, and functions to those of linear and exponential relationships from Mathematics I. The need for extending the set of rational numbers arises, and students are introduced to real and complex numbers. Links between probability and data are explored through conditional probability and counting methods and involve the use of probability and data in making and evaluating decisions. The study of similarity leads to an understanding of right-triangle trigonometry and connects to quadratics through Pythagorean relationships. Circles, with their quadratic algebraic representations, finish out the course.

4192/4193 P Int. Mathematics II-III CSU/UC (c)

10th Grade

Grad Credit: Math

Students in Mathematics II-III extend the mathematics concepts and skills covered in Mathematics I-II. Through both content standards and math practices, students deepen learning of concepts and skills in the critical areas of Number and Quantity, Algebra, Functions, Geometry, and Statistics and Probability. Students learn through deep analysis of the concepts and skills necessary for placement in AP Calculus upon successful completion of the Mathematics I-II through AP Pre-Calculus course sequence. **Prerequisite: Passed Math I-II with a C or better (or summer school bridges equivalent with a C or better).**

Mathematics

4172/4173 P Int. Mathematics III CSU/UC (c)

11th-12th Grade

Grad Credit: Math

The courses in the Integrated Pathway present mathematics as a coherent subject and blend standards from different conceptual categories. In the Mathematics III course, students expand their repertoire of functions to include polynomial, rational, and radical functions. They also expand their study of right-triangle trigonometry to include general triangles. And, finally, students bring together all of their experience with functions and geometry to create models and solve contextual problems.

4188/4189 AP Pre-Calculus CSU/UC (c)

11th-12th Grade

Grad Credit: Math

AP Precalculus is a third- or fourth-year mathematics course following completion of Integrated Math 3 or Integrated Math II-III. AP Precalculus prepares students for other higher-level mathematics and science courses. Students study mathematical functions through their graphical, numerical, verbal, and analytical representations and their applications in a variety of contexts. Additionally, students apply their understanding of functions by constructing and validating appropriate function models for scenarios, sets of conditions, and data sets. Students are expected to take the Advanced Placement exam at the end of the year to potentially earn college credit for this course. **Prerequisite: Successful completion of Int. Math II-III (or equivalent courses) with C's or better and an AP contract signed by the student and parent.**

4150/4151 AP Statistics (weighted GPA) CSU/UC (c)

11th-12th Grade

Grad Credit: Math

This course is designed for college-preparatory students to introduce them to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Topics of study include: exploring data, sampling and experimentation, anticipating patterns, and statistical inference. Students are expected to take the Advanced Placement exam at the end of the year to earn college credit for this course. Note: Juniors must be concurrently enrolled in Math III or AP Precalculus. **Prerequisite: Successful completion of Int. Math III (or equivalent courses) with C's or better and an AP contract signed by the student and parent.**

4148/4149 AP Calculus (weighted GPA) CSU/UC (c)

12th Grade

Grad Credit: Math

This course is designed for college-preparatory students planning to enter the fields of engineering, economics, life sciences, mathematics, physical science, and others. Topics of study include: limits, differentiation, integration, logarithmic functions, trigonometric functions, and more. Students are expected to take the Advanced Placement exam at the end of the year to earn college credit for this course. **Prerequisite: Successful completion of AP Pre-Calculus with a C or better, and AP contract signed by student and parents.**

Mathematics

4186/4187 P Quantitative Reasoning with Advanced Mathematical Topics (QRAT)

CSU/UC (c)

12th Grade

Grad Credit: Math

Quantitative Reasoning with Advanced Mathematical Topics (QRAT) was developed to better prepare college and career-bound high students with the 21st Century skills necessary to meet the mathematical thinking and problem-solving expectations of higher education courses and workplace requirements. **Prerequisite:** Successful completion of Int. Math III (or equivalent courses) with a C or better.

4184/4185 P Data Science CSU/UC (c)

12th Grade

Grad Credit: Math

This course will introduce students to the main ideas in data science. Students will learn to be data explorers in project-based units, through which they will develop their understanding of data analysis, sampling, correlation/causation, bias and uncertainty, probability, modeling with data, making and evaluating data-based arguments, and the power of data in society. **Prerequisite:** Successful completion of Int. Math III (or equivalent courses) with a C or better.

Modern Language

4426/4427 P Portuguese I CSU/UC (e)

9th-12th Grade

Grad Credit: Modern Language

This introductory course is open to all students who wish to begin the study of Portuguese as a world language. It is intended to develop novice to mid-novice oral and written language proficiency, reading and listening skills as well as the use of grammar and vocabulary appropriate for this level. Students will demonstrate competency by being able to communicate orally and in writing within the scope of each unit. The course provides multi-modal instruction, practice, and reinforcement of the target language and incorporates technology with the use of videos, songs, online games, document camera, Google Slides, and Google Docs by the teacher during regular instruction and by the students during projects and presentations.

4428/4429 P Portuguese II CSU/UC (e)

10th-12th Grade

Grad Credit: Modern Language

This course builds on the first year of Portuguese and is focused on culture, communication, and connections to other disciplines. Students will be expected to perform at a mid to high novice level by the end of this course. **Prerequisite: Successful completion of P Portuguese I with a grade of C or better, recommendation by teacher.**

4470/4471 P Portuguese III CSU/UC (e)

10th-12th Grade

Grad Credit: Modern Language

This course builds on the second year of Portuguese and is focused on culture, communication, and connections to other disciplines. Students will be expected to perform at an intermediate level by the end of this rigorous course. **Prerequisite: Successful completion of P Portuguese II with a grade of C or better, recommendation by teacher.**

4472/4473 P Portuguese IV CSU/UC (e)

11th-12th Grade

Grad Credit: Modern Language

This course builds on the third year of Portuguese and is heavily focused on culture, history, and fluent communication in Portuguese. Students will be expected to perform at an intermediate-high level by the end of this rigorous course. **Prerequisite: Successful completion of P Portuguese III with a grade of C or better, recommendation by teacher.**

Modern Language

4400/4401 P Spanish I CSU/UC (e)

9th-12th Grade

Grad Credit: Modern Language

Spanish I is an academic, college preparatory elective which requires daily attendance, verbal and written participation and reading comprehension. Students are required to communicate in the target language in both small groups and individually through listening and speaking activities. The teacher will use target language in both lecture and discussion. In order to succeed, students must commit to completing daily homework assignments as well as devoting a daily minimum of 20 minutes, outside of class, studying vocabulary and grammar concepts. Students will make connections and comparisons between English and the target language. Note: P Spanish I is not recommended for students who speak Spanish at home, or who have had consistent exposure to the Spanish language. Such students are highly encouraged to take P Spanish Speakers II.

4402/4403 P Spanish II CSU/UC (e)

9th-12th Grade

Grad Credit: Modern Language

Spanish II is an academic college preparatory elective which emphasizes communication, culture, and comparisons of language and connections across curriculums and communities. It is an intense academic elective which requires daily attendance and class participation, including performing within a classroom setting using the target language. The student is exposed to more Spanish by the teacher, his/her peers, and listening/speaking activities. Each student is expected to dedicate at least 30 minutes daily outside of class to homework, practice and study time.

Prerequisite: Successful completion of P Spanish I with a grade of C or better or recommendation by teacher.

4404/4405 P Spanish III CSU/UC (e)

10th-12th Grade

Grad Credit: Modern Language

This is a rigorous college prep course which applies and extends the grammatical and cultural concepts taught in Spanish II. Students will be required to communicate exclusively in the target language and to make connections and comparisons between Hispanic cultures and their own. There will be projects where the students will be required to draw upon community and technological resources for their presentations. Attendance, participation and completion of homework are necessary components for successful completion of the course. **Prerequisite:** Successful completion of P Spanish II with a grade of C or better or recommendation by teacher.

Modern Language

4406/4407 P Spanish Speakers II CSU/UC (e)

9th-12th Grade

Grad Credit: Modern Language

This course is designed for Spanish speaking students who desire to enrich their language skills by continuing to develop their listening, speaking, reading and writing abilities. In this course, the students will be exposed to a variety of literature genres from the Spanish speaking world. Students will be introduced to the diverse literature written in Spanish through a thematic approach that will provide them with the opportunity to experience the true purpose of literature. Through carefully designed activities and vocabulary work, the students are provided with the motivation and means to express their own thoughts, experiences and reflections. **Prerequisite:** This course is open to any native speaker of Spanish who already fluently speaks and comprehends the spoken Spanish language.

4408/4409 P Spanish Speakers III CSU/UC (e)

9th-12th Grade

Grad Credit: Modern Language

This course is designed for Spanish-speaking students who desire to continue to enrich their language skills with an emphasis on their reading, speaking, and writing skills. This course will provide a comprehensive grammar review as well as an analysis of literature written in Spanish. Throughout the course, students will be provided with the means to properly analyze literature in written form. **Prerequisite:** This course is open to native Spanish speakers who fluently speak and comprehend the spoken language and have successfully completed P Spanish Speakers II with a grade of “C” or better, or by teacher recommendation.

4410/4411 AP Spanish Language and Culture (weighted GPA) CSU/UC (e) 10th-12th Grade

Grad Credit: Modern Language

The AP Spanish Language course is designed to be an advanced level college/university Spanish course. It encompasses oral skills, reading, comprehension, grammar, and composition. Students will be expected to take the AP Spanish Language Examination in the spring of the course year in order to earn possible college-level credit. Students will need to complete an assignment during the summer as preparation for skills emphasized throughout the course. In order to earn possible college level credit, students need to complete an assignment in summer as preparation for skills emphasized through the course. Incoming ninth grade students that have completed the Dual Language Immersion Program may take this course. **Prerequisite:** AP contract signed by student and parent and successful completion of P Spanish III or P Spanish Speakers III with a grade of C or better, or by teacher recommendation

Modern Language

4412/4413 AP Spanish Literature and Culture (weighted GPA) CSU/UC (e) 11th-12th Grade
Grad Credit: Modern Language

The AP Spanish Literature course is designed to be an advanced level college/ university Spanish Course. The course furthers the study of culture, history, and literature. There is a strong emphasis on analysis, composition and research. Students will be expected to take the AP Spanish Literature Examination in the spring of the course year in order to earn possible college-level credit. Students will need to complete an assignment during the summer as preparation for skills emphasized throughout the course. In order to earn possible college-level credit, students will need to complete an assignment during summer as preparation for skills emphasized through the course. **Prerequisite: AP contract signed by the student and parent, and completion of AP Spanish Language with a C or better, or by teacher recommendation.**

Physical Education

5002/5003 Frosh P.E

9th Grade

Grad Credit: P.E.

This course is designed to present students with a balance of individual and team activities, with emphasis placed on the development of sound skill fundamentals and the "why's" and "how's" of movement. Students will participate in the following activities: football, ultimate frisbee, lacrosse, pickleball, physical fitness, soccer, basketball, volleyball, softball, hockey, and fitness timed runs. The primary goals of this class are: fitness, social skills, skill development, and activity. Students will be prepared for the physical fitness testing required by the state department of education. This course is required for all freshmen.

5004/5005 P.E.

10th-12th Grade

Grad Credit: P.E.

This program provides activities and games according to the needs and likes of the class. Physical fitness is emphasized with a vigorous exercise program prior to activities which include pickleball, football, soccer, fitness, volleyball, softball, hockey, basketball, and timed runs.

5007/5008 Weight Training

10th-12th Grade

Grad Credit: P.E.

This course teaches students the basic principles of strength training. They will learn a variety of techniques to improve muscular strength, muscular endurance, body composition, and flexibility. Students will participate in resistance training workouts, plyometrics, aerobic exercises, and stretching. **Prerequisite: Successful completion of Freshmen PEI.**

5009/5010 Advanced Weight Training

11th-12th Grade

Grad Credit: P.E.

This course will build on the concepts and techniques learned in Weight Training. Topics of study will include specialized techniques in lifting, powerlifting, bodybuilding, plyometrics, and basic anatomy and physiology. An individualized strength training program will be developed for each student. **Prerequisite: Successful completion of Weight Training and teacher approval.**

4522/4523 P Dance Production I CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art or P.E.

Dance Production I focuses on developing techniques in a variety of disciplines including: Jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic dance. Elements of dance composition will be explored through choreography assignments that culminate in a performance. A strong emphasis is placed on developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students have the opportunity to participate in the Fall/Winter and Spring Showcase, but are not required to: ticket sales, props, costume design, fundraising, and dance choreography. **Course Note: Enrollment in this course may conflict with certain athletic programs due to scheduling requirements. It is recommended that students who plan to participate in sports consult with their Learning Director before enrolling to ensure this course will not interfere with athletic participation.**

Physical Education

4524/4525 P Dance Production II CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art or P.E.

Dance Production II will build on the skills and terminology that students learned in Dance Production I. Dance Production II focuses on further developing technique in a variety of disciplines including Jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through more advanced choreography assignments that culminate in a performance. A strong emphasis is placed on further developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Fall/Winter and Spring Dance Showcase at the end of the year. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: Successful Completion of Dance Production I or instructor approval.

Course Note: Enrollment in this course may conflict with certain athletic programs due to scheduling requirements. It is **recommended** that students who plan to participate in sports consult with their Learning Director before enrolling to ensure this course will not interfere with athletic participation.

4592/4593 P Dance Production III CSU/UC (f)

10th-12th Grade

Grad Credit: Fine Art or P.E.

Dance Production III will build on the skills and terminology that students learned in Dance Production II. Dance Production III focuses on continuing to further develop technique in a variety of disciplines including Jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through more advanced choreography assignments that culminate in a performance. A strong emphasis is placed on further developing skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Fall/Winter and Spring Dance Showcase at the end of the year. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: Successful Completion of Dance Production II or instructor approval.

Course Note: Enrollment in this course may conflict with certain athletic programs due to scheduling requirements. It is **recommended** that students who plan to participate in sports consult with their Learning Director before enrolling to ensure this course will not interfere with athletic participation.

Physical Education

4526/4527 P Advanced Dance Production CSU/UC (f)

9th-12th Grade

Grad Credit: Fine Art or P.E.

Dance Production is an advanced class for students who are interested in performing and pursuing dance for personal interest, further academic preparation, or for a possible career in dance or a dance-related field. This course will continue to build on the skills that students work on in Dance Production classes. Advanced Dance Production focuses on perfecting technique in a variety of disciplines including Jazz, Ballet, Modern, Contemporary, Hip Hop, and Ethnic Dance. Elements of dance composition will be explored through advanced choreography assignments that culminate in a performance. A strong emphasis is placed on perfecting skills in dance technique and terminology. The history of dance and the development of critical analysis will be included in the program, along with the health-based curriculum. Students are required to participate in the Fall/Winter and Spring Dance Showcases. Students will be involved in all aspects of a performance: tickets, sales, props, costumes, fundraising, and dance choreography.

Prerequisite: This course is by audition or teacher recommendation only.

Course Note: Enrollment in this course may conflict with certain athletic programs due to scheduling requirements. It is **recommended** that students who plan to participate in sports consult with their Learning Director before enrolling to ensure this course will not interfere with athletic participation.

5120 Drivers Education

9th-12th Grade

Grad Credit: Elective

The course will present the rules of the road as well as the driving laws for the state of California. Students will have the opportunity to acquire the knowledge and attitudes essential to safe driving. A DMV "Certificate of Completion" will be issued to students earning both a "C" or better for the semester and also passing the final exam. This certificate gives students the ability to take the DMV test for their driver's permit. **Note:** This is a one-semester course that must be taken concurrently with Health.

5123 Health

9th-12th Grade

Grad Credit: Elective

The course examines the three components of health: mental, physical, and social, and how they interrelate and affect one's overall health. Topics of study include but are not limited to; self-esteem, handling emotions, managing stress, human development, nutrition, diseases, AIDS, and substance abuse. **Note:** This is a one-semester course that must be taken concurrently with Drivers Education.

5385/5386 Strength and Fitness

9th-12th Grade

Grad Credit: P.E.

This course will focus on the anaerobic training of students. Students will learn the benefits of strengthening the muscles of the back, obliques, and abdomen. Students will also learn the fundamentals of proper running and sprinting techniques. Students will learn a variety of skills that will improve their coordination and agility. **Note:** If a student is interested in this course for Zero Period, an application must be signed by student and parent, committing to a full-year course.

Physical Education

5019/5020 Sports PE (only offered 6th period)

10th-12th Grade

Grad Credit: P.E.

This specialized Physical Education course is designed for student-athletes who are interested in participating in school-sponsored sports. Sports PE focuses on enhancing athletic performance through sport-specific conditioning, strength training, agility drills, injury prevention, recovery strategies, and team-based fitness activities. Students will develop advanced skills in mobility, flexibility, endurance, and power to support in-season and off-season athletic goals. Emphasis is placed on personal responsibility, discipline, and maintaining peak physical conditioning throughout the academic year.

Participation in this class supports athletic development while fostering leadership, teamwork, and a competitive mindset. Students are expected to demonstrate commitment, maintain a positive attitude, and actively contribute to a culture of excellence on and off the field.

Prerequisite: Participation in a school athletic program or coach recommendation.

Science

4550/4551 P Physics of the Universe CSU/UC (d)

9th Grade

Grad Credit: Physical Science

Physics of the Universe is a Next Generation Science Standards aligned course that deals with the major aspects of physics and Earth and Space Science concepts. Topics include forces and motion, forces at a distance, energy conversion and renewable resources, nuclear processes and Earth's history, waves and electromagnetic radiation, and stars and the origins of the universe. By the end of the year, students will have developed skills to explain natural phenomena related to the macroscale universe.

4552/4553 P Adv. Physics of the Universe CSU/UC (d)

9th Grade

Grad Credit: Physical Science

Advanced Physics of the Universe is a Next Generation Science Standards aligned course that deals with the major aspects of physics in a more in depth level while integrating Earth and Space Science concepts. The class follows a traditional schedule with more in depth units on Newtonian Three Laws of Motion, Momentum and the Law of Conservation of Momentum, the forms of Energy and the Law of Conservation of Energy, Electro-magnetic Forces, , Waves and Oscillations, and finally Space and Astronomy. By the end of the year, students will have gained knowledge on how physics underlies all manners of life in the universe as well as skills to analyze and predict natural phenomena. **Prerequisite AP/Acc/Honors contract signed by student and parent.**

4266/4267 P Agriscience and Physics CSU/UC (d)

9th

Grad Credit: Physical Science

Agriscience & Physics is a collaborative standards-based laboratory science that fulfills the physical science requirement focusing on college and career readiness. This course gives students a foundation in physics with related earth science and agriculture phenomena in addition to the Science and Engineering Practices. The following units will be covered in this course; Motion, Force, Gravity, Waves, Light Waves, Electricity & Magnetism, Energy & Renewable Energy, and Nuclear Physics & the Earth. This course also provides an opportunity and expectation for students' participation in the National FFA organization including FFA participation and a Supervised Agriculture Experience Project.

4558/4559 P Chemistry in the Earth Systems CSU/UC (d)

10th Grade

Grad Credit: Physical Science

Chemistry in the Earth Systems is a Next Generation Sciences aligned chemistry course where students will explore physical science concepts that build comprehension around matter, its properties, and its interactions with other matter and energy. The units within this course are presented thematically to provide a context for student learning. Students will explore concepts in chemistry and apply their understanding of these concepts in the context of Earth Science. The integration of relevant Earth Science concepts such as plate tectonics, ocean acidification, and climate change are designed to deepen student understanding of chemistry's role in Earth's systems and society.

Science

4264/4265 P Chemistry in the Earth Systems-Medical Focus CSU/UC (d) 10th Grade

Grad Credit: Physical Science

Chemistry with a Medical Focus is a Next Generation Sciences aligned chemistry course where students will learn chemistry concepts and practice science skills through the use of medical case studies. Students will also explore careers in the medical field. This course is designed to create a link between chemistry and medicine to increase health/medical career awareness.

4560/4561 P Advanced Chemistry in the Earth Systems CSU/UC (d) 10th Grade

Grad Credit: Physical Science

Advanced Chemistry in the Earth Systems is an NGSS aligned chemistry course where students will explore physical science concepts that build comprehension around matter, its properties, and its interactions with other matter and energy in a deeper conceptual setting. The units within this course are presented thematically to provide a context for deeper student learning and application. Students will explore concepts in chemistry and apply their understanding of these concepts in the context of Earth and Space Science focusing on deeper exploration on the topics presented. The integration of relevant Earth and Space Science concepts such as plate tectonics, ocean acidification, and climate change are designed to deepen student understanding of chemistry's role in Earth's systems and society. **Prerequisite: Math I with a C or better and Instructor approval.**

4254/4255 P Agriculture and Soil Chemistry CSU/UC (d) 10th-12th Grade

Grad Credit: Physical Science

This course explores the physical and chemical nature of soil as well as the relationships between soil, plants, animals and agricultural practices. The course provides students the opportunity to learn chemistry, and understand how it relates to agriculture, specifically plant and animal production through hands-on activities and labs. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE involvement, both of which are graded components of the course.

4260/4261 P Biology the Living Earth CSU/UC (d) 11th Grade

Grade Credit: Life Science

This is the third course in the three year integrated science program based on the Next Generation Science Standards and includes interwoven Earth Science standards. The topics covered in this course include: ecosystems interactions and energy, photosynthesis and respiration, evolution, inheritance/genetics, cells and organisms, and ecosystem stability and the response to climate change.

4256/4257 P Sustainable Agricultural Biology CSU/UC (d) 11th-12th Grade

Grad Credit: Life Science

Sustainable Agriculture Biology is a one year course designed to integrate biological science practices and knowledge into the practice of sustainable agriculture. It includes cell organization and processes, plant and animal reproduction, genetics, ecology, evolution, and agriculture's impact on the environment and how we as agriculturists can make decisions to maximize sustainable agriculture practices within a functioning ecosystem. Due to the co-curricular nature

of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course. **Prerequisite:** Successful completion of Ag & Soil Chemistry or equivalent with a C or better.

4226/4227 AP Biology (weighted GPA) CSU/UC (d)

11th-12th Grade

Grad Credit: Life Science

The AP Biology course covers the topics that are regularly covered in a college level biology course, including molecules and cells, heredity and evolution and organisms and populations. The textbook is a college-level text and the lab work is equivalent to that done in a college setting. This course is designed to be taken by students who have successfully completed high school chemistry and who have a good work ethic when it comes to their studies. At the completion of the course, students take the AP Biology exam, which could earn them college credits. **Prerequisite:** Successful completion of Chemistry in the Earth Systems and AP Contract signed by student and parent.

4236/4237 P Anatomy and Physiology CSU/UC (d)

11th-12th Grade

Grad Credit: Life Science

This course is a study of the human body as a whole. It is intended to give the student a continued emphasis in science and the scientific process in the context of the human body. The course includes anatomy (the study of body part location and relationship to the whole) and physiology (the study of the function of the parts of the systems which make the body work.) Dissection of preserved animals is a requirement of this course. **Note: Juniors, in a medical pathway, must be concurrently enrolled in P Living Earth or AP Biology **Prerequisite:** Successful completion of Chemistry in the Earth Systems with a C or better.

4242/4243 AP Physics (weighted GPA) CSU/UC (d)

11th-12th Grade

Grad Credit: Physical Science

This college level course is an algebra-based Advanced Placement physics class. The course covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; and mechanical waves and sound. It also introduces electric circuits. Hands-on laboratory work, demonstrations, classroom discussions, and projects are the core of the course. Mathematical analysis of these concepts will be emphasized. The course is designed for students pursuing careers in science, engineering, or mathematics. The course curriculum and assignments are designed to improve critical thinking skills and prepare students to take the advanced placement exam. Students who earn a “3” or better on the AP exam may earn college credit. **Note: Juniors must be concurrently enrolled in CP Living Earth or AP Biology **Prerequisite:** ‘C’ or better in P Pre-Calculus/P Acc Math III, or concurrent enrollment. AP/Acc/Honors contract signed by student and parent.

Science

4232/4233 AP Chemistry (weighted GPA) CSU/UC (d)

11th-12th Grade

Grad Credit: Physical Science

AP Chemistry is the equivalent of an introductory college-level chemistry course in both the content and laboratory work. The skills and knowledge attained in the college prep chemistry course provides the opportunity to develop a deeper understanding of chemistry and the ability to think critically on problem solving. Students will be able to design, conduct and analyze investigation questions related to chemistry, and develop an understanding of composition and properties of matter, states of matter and chemical reactions. At the completion of the course, students take the AP Chemistry exam, which could earn them college credits.**Note: Juniors must be concurrently enrolled in P Biology Living Earth or AP Biology **Prerequisite:** Successful completion of Chemistry in the Earth Systems with a C or better and AP contract signed by student and parent.

1972/1973 AP Environmental Science (weighted GPA) CSU/UC (d)

11th-12th Grade

Grad Credit: Interdisciplinary Science

The AP Environmental Science course is designed to be the equivalent of an introductory college course in environmental science. The goal of the AP Environmental Science course is to provide students with the concepts and laboratory techniques required to understand the natural world, to identify and analyze environmental problems both natural and human-made, and to examine alternative solutions for solving or preventing them. Environmental Science is interdisciplinary; it embraces a wide variety of topics from different areas of study including Earth science, biology, chemistry, and physics. The textbook is a college-level text and the lab work is equivalent to that done in a college setting. This course is designed to be taken by students who have successfully completed both high school biology and chemistry and who have a good work ethic when it comes to their studies. At the completion of the course, students take the AP exam, which could earn them college credits.**Note: Juniors must be concurrently enrolled in CP Biology Living Earth or AP Biology **Prerequisite:** Successful completion of Chemistry with a C or better and AP contract signed by student and parent.

5428/5429 PH Agriculture Systems Management (weighted GPA) CSU/UC (d) 12th Grade

Grad Credit: Physical Science

Agricultural Systems Management combines an interdisciplinary approach to laboratory science and research with agricultural management principles. Using skills and principles learned in the course, students design systems and experiments to solve agricultural management issues currently facing the industry. Additionally, students will connect the products created in this class with industry activities to link real world encounters and implement skills demanded by both colleges and careers. The course culminates with an agriscience experimental research project in which students design and conduct an experiment to solve a relevant issue. Final projects will be eligible for Career Development Event competition at FFA events. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA activities and SAE, both of which are graded components of the course. **Prerequisite:** Successful completion of P Ag & Soil Chemistry or equivalent with a C or better. AP/Acc/Honors contract signed by student and parent.

Health Science and Medical Technology (CTE)

5534/5535 P Introduction to Medical Careers

9th Grade

Grad Credit: Elective

This is a basic course designed to help students prepare for the world of medicine with all of its many opportunities through the use of technology and hands-on learning in the classroom. Focuses included; medical careers, diseases, anatomy and electronic health records. This pathway allows students to develop from high school and completion of the pathway.

5532/5533 P Medical I (g)

9th - 10th Grade

Grad Credit: Elective

This course is designed to acquaint students with an overview of each body system and introduce: (1) medical terminology including word analysis of diagnostic, pathological, surgical, pharmacological, procedural, and laboratory terms; (2) ethics, confidentiality, and asepsis and disease perception and (3) the significance and importance of cultural awareness. Students will demonstrate the following career performance standards: personal skills, interpersonal skills, thinking and problem-solving, metric system conversion, data collection and analysis, oral and written communication, and assessing patient vital signs (temperature, pulse, respiration, and blood pressure). This elective course is required for the student to earn credit for the practical arts graduation requirement, as well as Health Career Academy recognition at graduation.

Prerequisite: Priority placement given to students continuing from Intro to Medical Careers

5540/5541 P Medical II (g)

10th - 11th Grade

Grad Credit: Elective

This course is designed to teach students how to conduct a holistic health assessment across the life span. Students will understand and apply the following objectives in the physical assessment of a patient: (1) structure and function of the body systems (Anatomy & Physiology); (2) subjective data (patient history); (3) objective data (expected findings, and common variations for healthy people); (4) common abnormal findings; and (5) application and documentation (sample charting, clinical case studies, nursing diagnoses, and critical thinking questions tied to information gathered during a physical examination). Various case studies will be presented for analysis as well.

Prerequisite: Priority placement given to students continuing from Intro to Medical Careers

5552/5553 P Certified Nurse Assistant (g)

12th Grade

Grad Credit: Elective

This double-period lab/course provides foundational preparation for employment as a Nurse Assistant in a skilled nursing facility. Students will learn essential skills in patient care, with a focus on the role and responsibilities of the Certified Nurse Assistant (CNA), through a series of sixteen modules. Topics covered include patient hygiene, mobility assistance, infection control, and end-of-life care, all based on the Model Curriculum for Nurse Assistant Training and Assessment Program, following Department of Health Services guidelines. Upon successful completion of the course, students will be eligible to take the state examination for CNA certification and further education in nursing and healthcare professions. Students will also gain practical experience in a clinical setting, where they will be required to purchase an appropriate

uniform, books, and pay application fees for the state certification exam. Field trips are not required.

Prerequisite: Priority placement given to students continuing from Intro to Medical Careers

5550/5551 P Hospital & Health Service Occupations (g)

12th Grade

Grad Credit: Elective

This double-period lab/course builds on the Introduction to Medical Careers class and focuses on learning entry-level skills in basic patient care as well as exploring a variety of hospital and healthcare professions. Students gain foundational knowledge and hands-on experience through observation and practical activities in different hospital departments. Instruction emphasizes professional behavior, communication, safety, teamwork, and patient confidentiality. Students will develop 21st-century skills such as problem-solving, responsibility, and collaboration while learning about the education and training required for various health careers. This course prepares students for making career choices in the medical field and postsecondary education in health and medical sciences.

Prerequisite: Priority placement given to students continuing from Intro to Medical Careers

Social Science

4332/4333 AP Human Geography (weighted) CSU/UC (g)

9th -12th Grade

Grad Credit: Elective

AP Human Geography is a year-long course that focuses on the distribution, processes, and effects of human populations on the planet. The course provides a systematic study of human geography, including the following topics: Nature of and perspectives on geography, population, cultural patterns and processes, political organization of space, agricultural and rural land use, industrialization and economic development, cities and urban land use. The purpose of this Course is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's Surface. Students will employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences. Students will also gain knowledge of the methods and tools geographers use in their science and practice, such as interpreting maps, data sets, and geographic models, GIS, aerial photographs, and satellite images. The course teaches the use of spatial concepts and landscape analysis to examine human organization of space. The course teaches spatial relationships at different scales ranging from the local to the global. The intent is to challenge young students with a college level social science course. Students who take and earn a "3" or better on the AP Human Geography exam may earn college credit. Summer course work may be required **Note: grades 10th-12th need to be concurrently enrolled in a History course.

Prerequisite: AP Contract signed by student and parent.

4320/4321 P World History CSU/UC (a)

10th Grade

Grad Credit: Social Studies 10

This survey course of history emphasizes the development of modern world history with an emphasis in the 20th century, for the purpose of showing differing political, social, economic, and religious concepts. Students will be expected to read primary and secondary sources, write in response to historical topics and themes, and complete homework and projects in and out of the allotted class time.

4324/4325 AP European History (weighted GPA) CSU/UC (a)

10th Grade

Grad Credit: Social studies 10

Recommended for the four-year college bound student, the content is more comprehensive than the standard World History Curriculum. Students should expect more outside reading and writing assignments. The study of European history since 1450 introduces students to cultural, economic, political, and social developments that played a fundamental role in shaping today's world. The goals of this course are to develop: (a) an understanding of some of the principal themes in modern European history, (b) an ability to analyze historical evidence and historical interpretation, and (c) an ability to express historical understanding in writing. This is a college level Course and students scoring a three or better on the AP Exam can earn college credits. Summer course work may be required. **Prerequisite:** AP Contract signed by student and parent.

Social Science

4326/4327 P US History CSU/UC (a)

11th Grade

Grad Credit: Social Studies 11

This survey course emphasizes modern United States history, focusing on the late 19th and 20th century. Students should expect occasional homework and outside-of-class tasks. In addition, semester projects may be required of all history students. These long-term projects enable students to utilize the skills of a historian---research a topic, analyze historical evidence, arrive at conclusions, and express historical understanding in writing.

4328/4329 AP US History (weighted) CSU/UC (a)

11th Grade

Grad Credit: Social Studies 11

Recommended for the four-year college bound student, the content is more comprehensive than the standard U.S. History curriculum. Students should expect more outside reading and writing assignments. AP U.S. History is designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and issues in U.S. history. The goals of this course are to develop: (a) an understanding of some of the principal themes in modern American history, (b) an ability to analyze historical evidence and historical interpretation, and (c) an ability to express historical understanding in writing. This is a college level course and students scoring a three or better on the AP Exam can earn college credits. Summer course work may be required **Prerequisite: AP contract signed by student and parent.**

4334/4335 P Ethnic Studies CSU/UC (g)

11th-12th Grade

Grad Credit: Elective

This course will allow students to further their understanding of identity development and gain a higher insight of self-knowledge. It will take a deeper dive into the historical and current oppression different ethnic groups have faced, as well as examples of solidarity between these different ethnic groups. This course will have an emphasis on literacy, with many readings, writing assignments, as well as Socratic seminars and presentations. This class will provide students with the opportunity to express their creativity, think critically about controversial issues, and contemplate solutions to these problems.

4312 P Economics CSU/UC (g)

12th Grade

Grad Credit : Social Studies 12

This semester course compares the American economic system to others around the world. Students will investigate microeconomics such as supply and demand in the open market, business organizations and unemployment; macroeconomics, the operation of large economic units, will also be examined along with international economic concepts. This course is a graduation requirement during senior year.

Social Science

4313 P Principles of Democracy CSU/UC (a)

12th Grade

Grad Credit Social Studies 12 int. math

This semester course will present the foundation of the American government. Students will learn how the government is structured and how it works. Topics of study will include: the Constitution and the Bill of Rights, the three branches of the government and how they work, federalism (how the national, state, and local governments work together), and how our government differs from others around the world. This course is a graduation requirement during senior year.

4330/4331 AP American Government (weighted GPA) CSU/UC(a)

12th Grade

Grad Credit: Social Studies 12

12th grade This is a college-level course designed to prepare the students for the AP exam in the spring and to give them a thorough understanding of the constitutional underpinnings of the U.S. Government. Topics include political beliefs and behaviors, political parties, interest groups, mass media, institutions of national government, public policy, civil rights and civil liberties. Students can expect extensive reading and frequent writing assignments. Summer course work is required. **Prerequisite: AP Contract signed by student and parent.**

Special Education

Special education programs and classes are available to students who qualify according to the guidelines outlined by federal and state governments.

Resource Program:

Students are mainstreamed in general education classes for most subjects, with support through pull out or push in services. The Education Specialists work in collaboration with general education teachers to ensure students' needs are met.

Special Day Class- Mild/Moderate

Students receive most of their academic subjects in special education classes. Students taking these classes will be eligible for a high school diploma if they pass all the required courses including Int. Mathematics I and earn the necessary 230 credits.

Counseling Enriched Program:

CVHS houses a regionalized program for students whose emotional issues impact their academic performance. Students in this program receive support from a teacher, paraeducators, and a mental health clinician as well as a behavior analyst. The goal of our program is to teach the students social skills, coping, and problem solving strategies to work through their emotional difficulties so that they can progress in their academic program. When ready, our students mainstream. Our ultimate goal is to help the students to acquire the skills he or she needs to self-regulate and manage behavior without it negatively impacting their academic progress.

4000/4001 English I Essentials

9th Grade

Grad Credit: English

Emphasized objectives are reading and writing competence through literature studies according to Common Core State Standards. The course covers the following units: organizational strategies, writing conventions, vocabulary developments, spelling and development of effective writing techniques. This class parallels the concepts taught in the regular education English courses.

4002/4003 English II Essentials

10th Grade

Grad Credit: English

Emphasized objectives are reading and writing competence through literature studies according to Common Core state standards. The course covers the following units: organizational strategies, writing conventions, vocabulary development, spelling, and development of effective writing techniques. This class parallels the concepts taught in the regular education English course.

Special Education

4004/4005 English III Essentials

11th Grade

Grad Credit: English

Emphasized objectives are reading and writing competence through literature studies according to Common Core state standards. The course covers the following units: organizational strategies, writing conventions, vocabulary development, spelling and development of effective writing techniques. This class parallels the concepts taught in the regular education English courses.

4006/4007 English IV Essentials

12th Grade

Grad Credit: English

Emphasized objectives are reading and writing competence through literature studies according to Common Core state standards. The course covers the following units: organizational strategies, writing conventions, vocabulary development, spelling and development of effective writing techniques. This class parallels the concept taught in the regular education English courses.

4206/4207 Physical Science Essentials

9th-12th Grade

Grad Credit: Physical Science

This course provides initial exposure to physics, chemistry, astronomy, geology, meteorology and oceanography.

4208/4209 Life Science Essentials

9th-12th Grade

Grad Credit: Life Science

This course is a survey approach to the study of biology with laboratory activities incorporated to enhance the text and lecture material.

4306/4307 World History Essentials

10th-12th Grade

Grad Credit: Social Studies 10

This course of history emphasizes the development of modern world history with an emphasis on the 20th century, for the purpose of showing different political, social, economic and religious philosophies which exist between cultures. The course includes a basic study of geography emphasizing man's relationship with his natural environment. This course exposes students to grade-level standards at a modified reading level.

4308/4309 U.S History Essentials

10th-12th Grade

Grad Credit: Social Studies 11

This course emphasizes modern United States history, focusing on the 20th century. This class covers topics including: the first people to inhabit the U.S., the acquisition of the 50 states, changes in the society, the new government developed by the Founding Fathers and how the major wars changed the course of history.

Special Education

4310/4311 Civics Essentials

10th-12th Grade

Grad Credit: Social Studies 12

This course will present the foundations of the American government and economics. Students will learn how the government is structured and how it works. Topics of study will include: the Constitution and the Bill of Rights, the three branches of the government and how they work, federalism how the national, state Economics compares the American economic systems including supply and demand, business organizations, unemployment, etc

4160/4161 P Math IA

9th-12th Grade

Grad Credit: Math

This course focuses on the first semester content standards and math practices taught in the Mathematics I course over the period of one school year.

4162/4163 P Math I B

9th-12th Grade

Grade Credit: Math

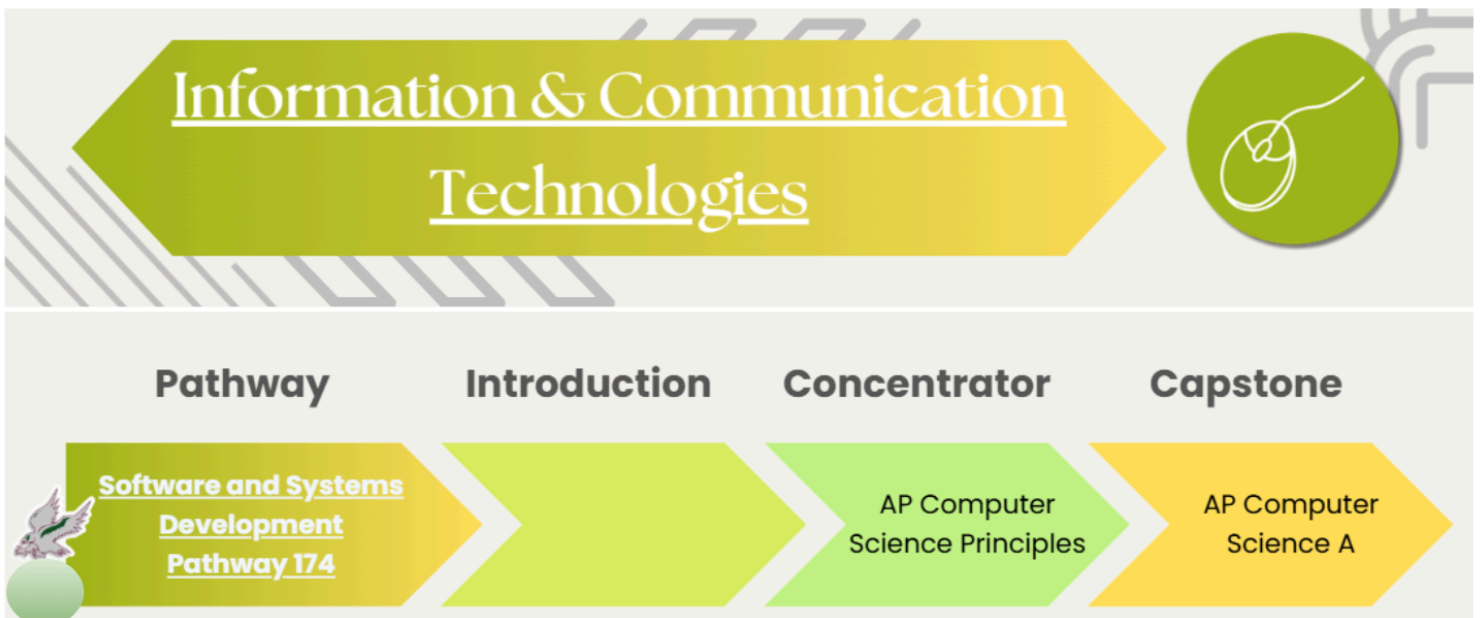

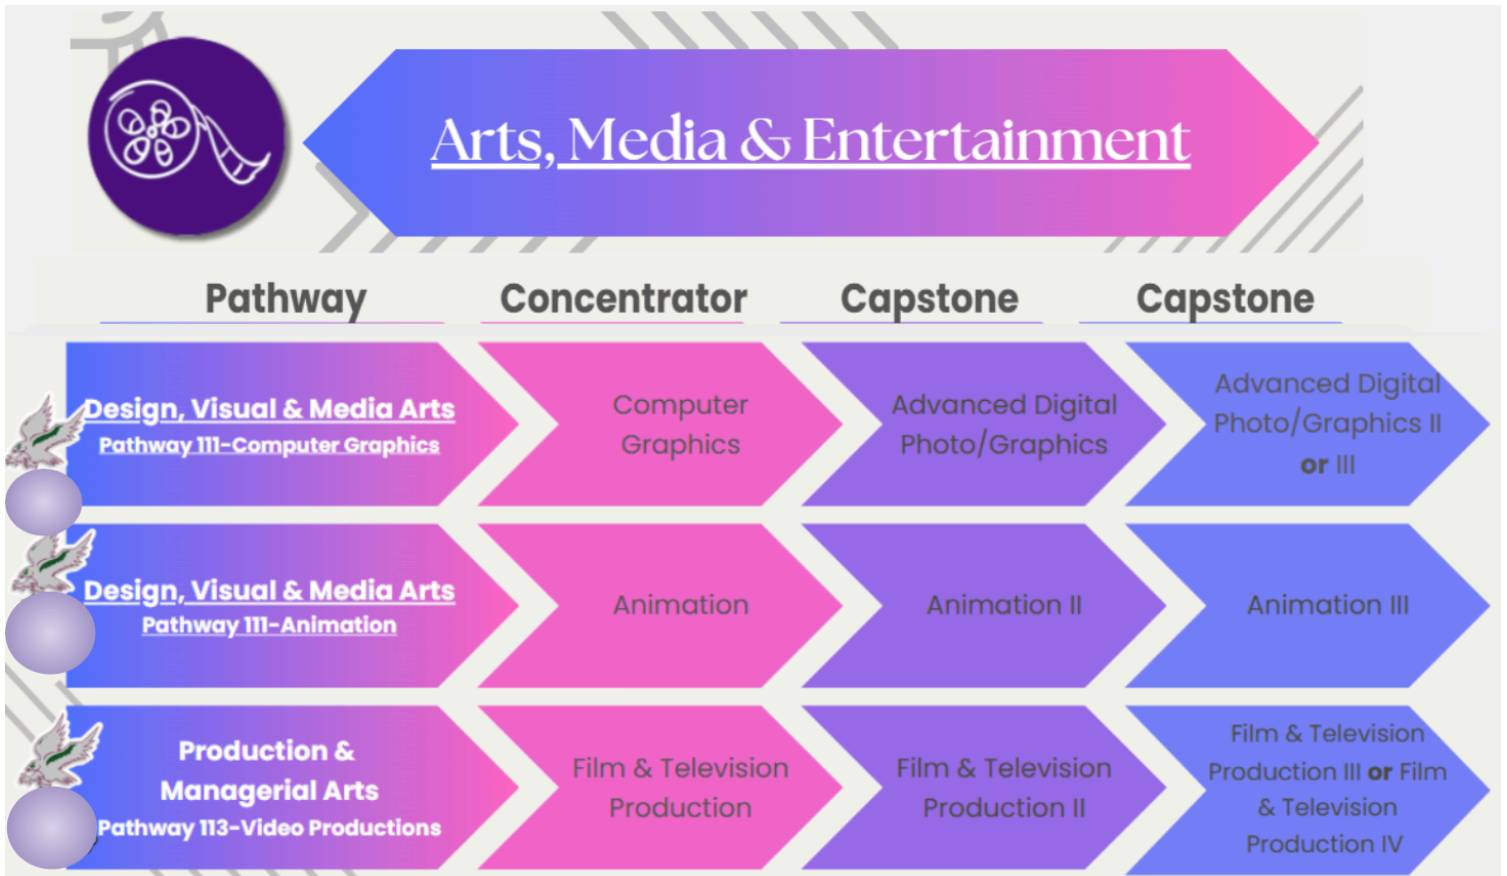

This course focuses on the second semester content standards and math practices taught in the Mathematics I course over the period of one school year.

5344/5345 Consumer Math

12th Grade

This course presents mathematical skills and concepts in meaningful, real-life situations. The purpose of this course is to help students become proficient, confident problem solvers and consumers. Topics covered include: calculating payroll for part-time and full-time employment, basic purchases using sales tax, checking and savings accounts, credit, personal finance and budgeting, automobile expenses, federal/state income taxes, buying a car, and investments.
